MSWD_PROJECT__36_TO-DO-LIST:-

This react project was developed by:

1.TEAM LEAD NAME & ID NO : THOTA N V S L GOVINDHU VINAY   ID:190031618

2.TEAM MEMBER NAME & ID NO: KURADA VINAY SRIKRISHNA   ID:190030910

PROJECT ID:- 36

PROJECT TITTLE:- A GAME OF TIC-TAC-TOE

PROJECT INFO:-

The example game is pulled from React's official tutorials but is brought up to date using React hooks - the latest hot topic in the React world.

This article gives you an overview of the tutorial and lets you click through to the screencasts and play with the code at any time.

If your HTML, CSS, JavaScript or React skills feel shaky, never fear - Scrimba offers a huge range of tutorials to bring you up to speed. We recommend the following courses to get you ready for the tic-tac-toe tutorial:

- **HTML & CSS Crash Course** with Kevin Powell

- **Introduction to Javascript** with Dylan C. Israel

- **Learn React for Free** with Bob Ziroll

In true Scrimba style, the Build Tic-Tac-Toe with React Hooks tutorial contains loads of interactive challenges along the way, so you'll embed your learning and feel like a hooks wizard by the end of it.

The course is led by Thomas Weibenfalk, a passionate developer, designer, and coding instructor from Sweden. Thomas loves teaching people about front-end development, especially React, making him the ideal teacher to take you through this learning experience.

Assuming you're ready to go with tic-tac-toe, let's get started!

OUTCOMES OF THE PROJECT:-- TO-DO-LIST:-

1.Made this project for me to better learn React.

2.js with the Flux pattern, as well as handling user authentication using social login APIs.

3.Built on node.js/express/mongo DB on the back end, and React.js/Flux on the front end.

Running the project:-[:-]

1.Install node.js and npm.

3.Install dependencies $ npm install

4.Start app And run the app $ npm start
